It should be remarked that this company will become at once possessed of two businesses with established connections, without any interruption to working or loss of time in transfer, and will therefore have from the first day of its peacession a revenue from a business which is capable not only of immediate, but, in the future, almost suffinited extension.

Most similar undertakings of any magnifude are now worked successfully by joint stock companies, both in Great Britain and in the United States.

The transfer of the property to the Company will only be made upon terms satisfactory to the Provisional Board of Directors, based upon the valuation. The Shan of Porcis.

The Courts of sussis and England have been enjoying a new consation in the person of Nusserood-Deen Shan of the Persian Empire. As the relating head of one of the most ancient of earth's dynasties, and the first of the long line of Persian kings who has ever visited any portion of the European continent, it was only becoming that he should receive a right royal welcome from the governments and peoples of the various KWONG LEE & CO. countries visited by him. It is no unbauel thing for the people of the American contito describe the the Old World; but comparce with the empire of Persia, Russia,

France, England and Persia, Russia, France, England, etc., are but in their vigor of youth. Russia was a howling wilderness for centuries after Persia bad taken rank at one of the foremost nations of the earth, and before the ancient Britam had taken their first lessons in civilization, Persia gave laws for the good government of more than onehalf of the then known gorld, A visit, there fore, from a petentate of such distinction fe marked with all the peap and splender that those mighty western powers could bestow upon it, with only what the occasion demand-ed. On the part of the Shah the visit was doubtless only one of pleasure, and to gain a more accurate knowledge of the world, be-youd the confines of the worldominions, from personal observation and intercourse, than he could possibly obtain by any other means. But on the part both of Russie and England, the Shah's presence in Europe is considered an event of more than ordinary political sig-nificance. Boll those powers have much to gain by securing the friendship and the Shah's aid as an elly, should circumstances in the future on the part of mither demand his assistance, and co-operation. Russia looks forward to the extension of her power in Asia, and England cannot but view with a jealous eye her movements eastward as threatening also once per week east ware between View on the contract for one, two or three years, at the option of the Passmaster Generation on the passion of the Passmaster Generation of the Contract for the convey of the conv to disturb the tranquility of her Ledian nos. al, once per week and way, between Vic-sessions. From the peopler geographical toria and Nanaimo and once per fortnight position of Persia, that State could exert a each way between Nanaimo and Comox, from powerful influence for good or evil, as the case might be, in the event of war between England and Russia, whether for an exten-sion of power in Asia, or the accomplishment of Russia's cherished dream of one day wresting from the hands of the Sultan o Turkey the key of the Bospherus, as Con-stantinople is called, and therewith the com-mand of the Black sea and the freedom of the Mediterraneag. If Russia should succeed in effecting an offeneite and deensive alliance with Persia, her chances of success in the accomplishment of her purposes would be very greatly enhanced, and on the other hand, should England get the inside track of Russia in this respect, it would add greatly to her security in the Bar, and the better enable her to thwart the designs of Russia, should she again attempt to lay violent hands upon Tarker Hance, looking to their own respective interests neither pains nor expense will be spared by England on the one hand and Russia on the other, to make a favorable impression on the other, to make a layorable impression on the mind of the Shah and to make his visit as greeable as possible. A contemporary describes the Shah's visit to Europe as "an event in diplomacy, and from the peculiar relations borns by the two great European Powers to Asia and to each other, may consider that his great purpose in coming is to see both Russia and England for himself, to compare the two, to confirm with the statesmen of both, and from all this to make up his mind what course, as between these two rivals for dominion in the East, it is Persia's interest to take. We do not think it taking too saaguine a view of our own chances in the diplomatic game to believe that we have the advantage rather on our that we have the advantage rather on our close well side, after all. As the London Times well observes, Russia bas had the first word with the Shab, but England will have the last, and will probably be able to send her iffustrious visitor away with good impressions. He will, beyond doubt, see more to interest him in the latter country; is fact the contrast between England and Russia will appear little less than between Russia and Persia. In everything, wherein the West differs from and excels the East, England is immeasurably in advance of Ranks, and the Shaw and Bed Quilts, Henry Grey Cothis Ministers cannot fail to note the fact, while they will be abundantly able to appreciate its significance of signic statesmen, though unlearned in physical science, are born soldiers and diplomatete, and bare back Towels, men's & woman's perfect comprehension of political situations. No mere General Boum, or Minister Pumpermickel, will be able to impose himself of England's present visitors for a great man, nor will they be at any loss to inforstand when the men are that really stand and the men are that really bear rule in Europe. We may have every confidence, indeed, that those who have to speak and set for England will be capable of the task put upon them, and that nothing that ought to be done will be neglected. The Quean has probable by this time received her lifestrious guest, and the brief accounts of his convoy across the channel by a flect of issociate, and the brief accounts of his convoy across the channel by a flect of issociate, and by the Frince of Wales, leads us to believe that so the all that has been done has been done well. Gladstone and Granville will surely be equal to the occasion; and Mr. Grant Duff, we believe, is prepared to address the Shah and his Ministers in their own tongue, as if the the manor born, and will probable say comething to them in Persian.

he will leave for home convinced that Roy-land rather than Russia is his natural ally." ARRIVED -A. B. Gray's Summer Goods. THE SAN JUAN MUNDER CAMES ONCE MORE. TURSDAY, July 15th, 1873. The Magistrate said be considered the case against Joe complete, but would have to

rea and him from week to week. Mr. McCreight submitted that there was no evidence against Charley; the only evi-dence given was by Jor, which was contra-dicted over and over again; it was perfectly some strong evidence for him. It has been swore that there were the toot marks of one person only ; and those marks correspond with Joe's boots. As the matter has been so ong before the Court and no evidence forthcoming, he submitted there was no course

left but to discharge Charley.

Mr. Courtey would again call upon the Court to remand Charley. The Extradition Act was once called in force here; and even if he bad had evidence which would hang Charley be would not bring it forward here; it would have to be brought forward in the American courts. Mr Courtney then reminded the Court of the tediousness of the pro cass of getting the extradition carried out, asbetween the Governor of Washington Territory, the President of the United State, the Governor General of Canada and the authorities here the matter. He again asked that Ch rley be remanded.

The Magistrate said that as there was no sufficient evidence, be believed that in again remanding Charley he would be interfering with the liberty of the subject.

An argument erose as to the application of Acis under the Extradition Treaty,

Mr. Johnson said it was scarcely possible with the information in the Province to argue the question properly, whether the Act of 1870 or the old law was in force. He said that so long as the authorities of the United States were moving in the matter, that justice would be done ultimately.

The Magistrate said it was the evidence not the extradition law, by which he had to

Mr. Johnson replied-He believed the case

was sufficient for remand if only on account of its suspicious character. Mr. Courtney said it was not deemed necesuntil after the preliminary steps had been watch the onward march of their children taken. The last remand was as a matter of course. The Governor of Washington Territies yourh is making the parents towards useful knowledge, while in large cities yourh is making the programment of the programment tory was in communication with the President of the United States, and the President tunities for better attainments notwithstand with the Governor General of Canada to ing. Mr. Jubasen again pressed for a remand borer is perhaps as strong as any evidence because the United States authorities were which can be adduced in dealed of a state-

THE WATER QUESTION .- This knotty point is still in abeyance, no arrangement having yet been arrived at by the Council and the Spring Ridge Water Co. The latter want meats by which the English agriculturist, not the Civic authorities to make the first over- knowing their origin, would feel insulted. Spring Ridge Water Co. The latter want ture, but they looking at the state of affairs in a business point of view, await a act wishing to charge the city an exorbitact figure which would be rejected, are equally desirous of feeling the pulse of the warket and obtaining the most remunerative terms pessible. It is aurmined that a tender will be opened at the meeting of the City Council to-night, wherein a responsible party offers to supply the Fire Department and citizens generally at prices equivalent to and not more than those charged by the Spring Ridge Water Co. previous to their notification of discontinuing the usual supplies.

Norming can be more abourd than the Opposition pretension that the Ministry violated the constitution in giving Manitobs and British Columbia more representatives in Parliament than their actual population war-ranted. The Act of Confederation expressly ranted. The Act of Confederation expressly states that these Provinces should be admit-ted upon such terms as might be defined by the Canadian Parliament. In either case it would have been absurd to have supposed that these Provinces should have adopted the population rule, pure and simple, consider-ing the belplessness in which it would have placed them. When their population shall have reached the number fixed by the law they will come under the same regulation to the distribution of the representation as now applies to the Provinces first contederated.— Ottows Times BY THE BOAKA C. ricultural laborer to Bugland could scarcel be imagined than is displayed in an editoria article of the Daily British Colonies, dated the 13th inst.; our attention has only just been directed to the article. Netwithstanding a few days since, the same organ rejoiced (nypocritically) that it was one of the many children of "good old England." The writer with a hombustic announcement that slavery reigns supreme in its parental coun try, goes on to say, with reference to Lord Henniker's bill moved in the educational in terest of the young, that "it has long been the practice of poor or worthless parents to hire out their children for farm work, living more or less upon the price of their toil. In this way thousands of boys and girls, down to the tender age of five, are employed in the lighter branches of agricultural labor. An how are they treated? On an average cer-tain v no better than were African slaves in the Southern States of America. There is the meagre fare, the sharp weip or beary fi-of the task-master; and when the unequa labor of a long day is over, the poor, worn-out brat staggers into its straw bed, where hey are packed on the barn floor like be rings in a barrel. Morning dawns, and the crack of the whip reminds the poor, bewileered thing that its misery is not over, the nother day of toil is before it; and thu England's sons and daughters, wrenched pre maturely from their mother's knee, are doomed to an endiess round of toil which the society for the prevention of cruelty to ani mals would not for a moment tolerate !" Now to those she have lived in, or ever visited the agricultural districts of Eagland, the above statement will at once condemn it-self as fabulous and sensational, for it is well known that a more contented, and at the same time striving class of people than Brit ish agricultural laborers are not to be found

amongst the vast population of the world who live by " the sweat of the brow." Liv. who live by " the sweat of the brow." Liv. Co. We are indebted to Mr. Smith, purser, ing upon weekly wages which in this and for the following memorandum of the round other comparatively young countries, would navarally be considered a mere pittance, the tiller of England's soil presents a much morhappy and comfortable bome than do the bousands of mechanics who earn a ver much larger compensation (proportionately) in the densely populated city of London, and throughout the masufacturing districts generally. Their children, in a domestic point of view, are better brought up, and although educational advantages are not so easily availed of in the agricultural parts of the country as elsewhere, where schools are numerous and the facilities for attending them within the reach of all, still it is with pride

There was a little excitement in town yesterday amongst those who were unaware of the nature of the cause of the stir concernrailway matters. Some had is that ground would be broken on Saturday, the 19th, as the 20th fell upon Sanday, in accordance with our suggestion contained in yesterday's paper, and consequently there were tight of relief from many who feel a depression consequent upon the dull times now preng the first sod would be the signal for much resperity. Others again heard a rumor that telegram was received from Ottawa to the effect that Sir Hugh Alian's railway scheme had fallen to the ground; that the Government had refused to sanction the agreement made with the English capitalists, and that the Canadian Pacific would have to be constructed by the Government itself. The the best of its ability ferreted out the matter, and was gratified to learn that the whole thing arose from the fact that one of our O tawa M. P.'s had been sent what purported to be a telegram containing the substance of the above, but which was in reality burlesque cut sent him by some wag hat which has been burdening our American cousins on the other side for some few years past. But with regard to the question as to the precise spot where ground shall be broken for the terminus, people speculate on he line will have its terminal point in the vicinity of Belmont House.

LANGLEY STREET, VICTORIA, 28th June, 1873. DEAR Sts,-In the course of the discussion which took place in the Legislative Assembly ast winter upon certain resolutions intri duced by you respecting the construction of a dry dock at Eaquimalt, you promised to inform me during the recess of the result of certain negotiations which you stated the Provincial Government was about to open with the Dominion Government, with a view to securing a more liberal guarantee for the Dock, both as to amount and time. I beg to inquire whether the subject has been brought under the actice of the Dominion Governnent, and if so, w th what result? Requesting the favor of an answer at your erly convenience.

Your very obed't serv't,

VISTORIA, July 14, 1873. DEAR Sts .- In reply to yours of the 28th June respecting resolutions passed by the Legislative Assembly concerning the proposed Esquimalt Dock, allow me to say that so far as I am aware, the matter is still under con-sideration. One point is decided, however, and that is, if the Dominion Government decide to construct a Graving Dock in any of the other Provinces, it will build the Esqui-malt Dock as a Dominion public work. Now I have been informed by the Hon. Minister of Finance, that the Hon. Minister of Public Works and himself favor the construction of their views should be adopted by the Cabinet, then, of course, Esquimalt Dock will be constructed by the Dominion Government. Before the next meeting of the Legislative Assembly I hope to be able to inform you of the final decision of the Dominion Government on the matter contained in the resolutions, and if so, I will freely communicate the

Very truly yours, A. DECOSMOS. Hon. A. R. Robertson.

The American and Canadian Worth West.

It is a truism of political economy that property is most valuable in a country where the law protects it most effectually. In the same way the great North-West of Canada is much more valuable as a field for immigration than the the corresponding portion of the United States. When the deputation of of the questions they put to Mr. Sanford ther any danger was to be apprehended from the Indians. He replied by taking out of his pocket a knife which had a blade at one end and a corkscrew at the other, remarking at the same time that that was the only weapon he carried when making his late journey from ocean to ocean. In glaring contrast to a

fact like this is the announcement in a New York peper that a military force of 2,000 soldiers-infantry, eavalry, and artiflery-is being concentrated at Fort Rice, in Dakota, with the view of an early departure from that place, with Gen. D. S. Stanley as commander-in-chief upon their march through Dakota and Mostanii as an escort to the surveying party engaged in making the surveys of the North-ern Pacific Railway westerly through these It is insisted that the pretty "Lulu" who does the flying leap at Niblo's, New York, noted by our emigration agents, and brought ach is this recognized amongst Indians themselves that hostile tribes from far to the south have been in the babit of emigrating in a body to our territory, and craving to be taken under the protection of the Great White Mother, whose rule they know to be so

much more bevign than that of the hated "Long Knives," as they call the Americans. Is Mormonism Dying Out !

This is a question often asked, and as often answered in the affirmative. It is said that the influx of Gentile population into Utah, and the development of the mineral wealth of the territory, are gradually but surely strengthening the anti-Mormon influence. In this view, bowever, no account is taken of the additions to the dominant population by foreign immigration, and the Mormon power for propagandism in Europe. That Mormon ism is still obtaining many recruits abroad ism is still obtaining many recruits abroad, is well illustrated by the proceedings of the London (England) division of the Marmon conterence; teld about a month ago. It was stated that the London district, notwith-standing the constant reductions by departures to the promised land, still numbered 1,500 members. As the rural districts of England and Wales are the special strongholds of the Mormons in Europe, the ratio in London would indicate the existence of a total of from 15,000 to 20,000 of that persuasion in the United Kingdom. These 15,000 or 20,000 Mormons may at some time not very or 20,000 Mormone may at some time not very comete, be expected to set out for Utah. Add to the English and Welch Mormons the Scandinavians who have embraced the faith, and it will be seen that if home influences tend to lessen the number of adherents in Utah, the foreign supply still keeps up the whole number to a good round figure.—S.F. Bulletin.

The new Canada is only six years old to-morrow, and yet what a bound it has made in the way of substantial progress!! Then file sailed at her usual hour yesterday for the four Provinces were drawn together, one of them much against its will. Now that carrying the overland mails, freight and a Scotia is to-day one of the most carnest supdiscontent bas been evercome, and Nova of the Northwest was deemed in the far VICTORIA AND EAST COAST MAIL CONTRACT. Tuture, and the alliance of British Columbia Tenders on a proposed contract are called, as with the Dominion was looked upon merely as a possibility within the next twenty years. To-day we have the Northwest and British be "one of us," and we have now to wait for nothing but the incoming of Newfoundland

ity. Look at the bank returns, the ra lway returns, and the customs receipts! These speak volumes for the rapid growth of our country and afford a true index to the measure of its progress. Surely we ought to honor Dominion Day.

EDITOR STANDARD:—We have now loading at Burrard Inlet a Canadian ship (the St. Peter) owned by a Canadian living in Quebec. This being the first instance in which a vessel hailing from one of our sister Provinces has reached here since Confederation (and if I mistake not the first on the Colonial record) I would suggest to the Government and Municipality of Victoria, the capital, that some complimentary overtures should be extended to the ship as a graceful act of courtesy to Quebec, and the other Maritime Provinces of the Dominion. It is usual to mark events of far less importance with some special evation in every part of the world, and we of British Columbia ought not to pass this opportunity without a fitting acknowledgement of our commercial relationship.
